&CoLetter

To whom it may concern,

We would like to express our appreciation for the work that Second Generation provided constructing the millwork for &Co's award winning design for HOOPP Realty Inc's LEED Gold office project, AeroCentre V in Mississauga, Ontario. Their attention to detail in manufacture and particularly in the installation of large feature wood walls was a big part of what turned out to be a very satisfying project for all concerned. We would be happy to recommend them for commercial millwork projects in the future.

Thank you,

Sweeny Sterling Finlayson &Co Architects Inc.
