Attn: Mr. Robert Antonel

Re: Letter of Reference - Second Generation Furnishings Inc.

Dear Robert:

One of the most common complaints we receive from Owners is about the quality of the millwork finishes, millwork hardware and millwork installation. I can honestly say that whenever Second Generation is involved in a project we are pleased with the finished product.

Your company's attention to detail even during the tender stage and focus on quality is an obvious result not only of your many years of experience providing millwork to the school industry, but also of your diligence and attention to all the details that create an excellent finished product. Your carefully detailed shop drawings and follow up on details ensures an installation and finished product that are of the highest quality.

As architects who takes pride in a high quality finished product, we have been very happy with your work over the years and look forward to working with you again in the future.

Yours truly,

Robert Ferkul
