TO WHOM IT MAY CONCERN

Regarding: **Second Generations Furnishings Inc.** -  
Letter of Reference

Second Generation Furnishings Inc. is currently preparing the millwork for our Loyola Catholic Secondary School project for the Dufferin-Peel Catholic District School Board, as well as our Chinguacousy Secondary School project addition and renovation for the Peel District School Board. Over the past many years and for several other projects, mostly schools, Second Generation has been the millwork subcontractor most often engaged by the General Contractors who successfully bid our Tendered projects.

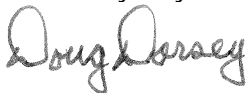

The fact that so many General Contractors carry Second Generation in their bids for our Tenders suggests to us that Second Generation's pricing is competitive within the industry.

The fact that the regular General Contractors who bid our projects continue to carry Second Generation suggests to us that Second Generation's quality and reliability can be depended upon.

So many of our school construction projects demand timely production and delivery of the millwork, and the School Board clients have demanding and well established performance expectations.

From the shop drawings stage to review of the finished product installed, my office and our clients appreciates the care and attention that Second Generation brings to our projects.

Yours very truly,

Doug Dorsey, B.E.S., B.Arch., OAA  
Director – Contract Administration  
Stafford Haensli Architects Incorporated
